WHY **ADVANCED XL YARDENI** LOCKS?

Leading Locks key High Security lock brand is **Yardeni**. Founded in 1947, Yardeni is one of the leading brands in Israel lock industry. Yardeni locks conform to both Israel standards as well as International standards with relevant certifications.

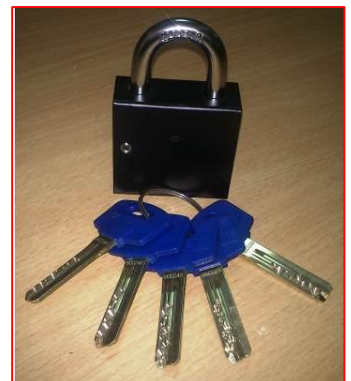

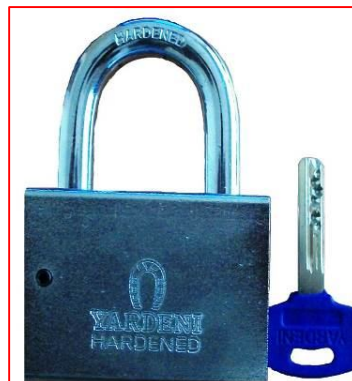

The security level of Yardeni Locks is defined by their unique inner pins arrangements, rust and drill resistance, quality hardened outer shells and shackles, and unique and high security reversible keys. **While other common security locks and cylinders have 5 or 6 inner lock cylinder pins arranged in a straight line, Yardeni locks and cylinders have 9 pins arranged in zigzag pattern making them impossible to be opened with any other key or be picked.** It is for these unique security features that Yardeni Locks and cylinders have been adopted by several leading Kenya companies with Safaricom currently having thousands to secure their high risk remote transmission sites country-wide. Leading Lock has all the necessary skills to fully service all Yardeni high Security padlocks.
